

MARC NAVARRO

DATA ANALYTICS ENGINEER

PROFILE

Analytics Engineer with 6+ years of experience in renewable energy operations, asset management and data analytics. Experienced in SQL, Python, BigQuery, dbt/Y42, data modelling and ETL pipelines, transforming complex operational processes and large-scale solar time-series data into reliable data models, business logic and automated workflows. Previously led analytics for a 200+ asset international solar portfolio, combining deep renewable-energy domain knowledge with hands-on data engineering and cross-functional product experience.

EDUCATION

2026 - Data Science & AI Bootcamp (Le Wagon)

- End-to-end data, ML & AI skillset
- Applied, project-based experience

2019 - Double Masters Degree:

- Electrical Egineering (INP, Grenoble)
- Energy Innovation (KTH, Stockholm)

2016 - Bachelor Degree:

- Mechanical Engineering (UPC, Barcelona)

EXPERIENCE

ecoligo GmbH - Data Analytics Lead

SEPTEMBER 2024 - MARCH 2026 / BERLIN, GERMANY

- Built and maintained ELT pipelines, BigQuery warehouse models, and SQL transformations for a 200+ asset solar portfolio.
- Designed normalized data models combining SCADA, ERP, contractual, and financial data into analytics-ready datasets.
- Developed reusable KPI calculation layers and reporting models supporting cross-functional operational and financial reporting.
- Integrated REST APIs, automated validation checks, and transformation workflows to improve data quality, reliability, and availability.

ecoligo GmbH - Asset Manager / Head of Asset Management

JANUARY 2020 - AUGUST 2024 / BERLIN, GERMANY

- Led technical and financial asset management for an international solar portfolio
- Translated PV performance, O&M, monitoring, finance, and investor reporting needs into scalable KPIs and data structures
- Managed cross-functional workflows across operations, finance, engineering, and software/product teams
- Built strong domain expertise in solar assets, monitoring platforms, installers, and operational reporting

Feedgy - Product Owner

JANUARY 2019 - AUGUST 2020 / PARIS, FRANCE

- Led development of a solar monitoring platform connecting O&M workflows with software delivery
- Translated solar portfolio and installer/operator needs into product features and dashboard logic
- Worked with users and developers to validate monitoring, reporting, and operational product features

SKILLS

HARD SKILLS

- Solar PV Operations & Renewable Energy - Expert
- SQL / Data Modeling - Advanced
- BigQuery / Data Warehousing - Advanced
- dbt / Y42 / ELT Pipelines - Advanced
- BI & Semantic Layer: Looker, KPIs
- Python / Pandas - Advanced
- Data Quality & Governance
- Metabase - Basic exposure

SOFT SKILLS

- Solution Oriented
- Leading by example
- Self-learning Oriented
- Coaching & training
- Peer communication
- International background
